Appspace Acquires Igloo Software, Expanding Its Global Leadership in Employee Communications

Acquisition expands Appspace's customer base and deepens its leadership in workplace communication, intranet, and employee experience solutions

Tampa, Fla. – September 11, 2025 – Appspace, the workplace experience platform that keeps everyone in the know, today announced it has signed a definitive agreement to acquire Igloo Software, a leading modern intranet provider.

This strategic move strengthens Appspace's position as a global leader in employee communications and intranet solutions. It adds more than 325 customers, including Fortune 500 companies and global leaders in the healthcare, retail, manufacturing, and hospitality sectors. With a unified platform approach and continued momentum, Appspace is leading the shift toward people-first workplace experiences built for clarity, agility, and the realities of today's distributed workforce.

"As organizations invest in more effective ways to engage employees, from corporate offices to the front lines, they are looking for seamless platforms that reflect how people actually work," says Tony DiBenedetto, Chief Executive Officer of Appspace. "This acquisition strengthens our ability to connect the dots across communication, content, and space, and it expands our ability to help organizations inform, support, and empower their team members in every environment."

Appspace offers a robust intranet and communications platform used by many of the world's largest companies. The addition of Igloo's team brings complementary expertise in employee communication, culture-building, and digital workplace strategy.

Igloo customers will continue to receive full support. Additionally, they have the opportunity to explore and transition to the fully integrated Appspace platform, which

brings together a modern intranet, employee mobile app, digital signage, space reservation, visitor management, wayfinding, and more.

“The future of workplace technology belongs to platforms that are flexible, unified, and designed to support real-world work across roles, teams, and locations,” says Mike Gaburo, Chief Executive Officer of Igloo. “We’re building on our strong foundation of doing what’s best for Igloo customers and giving them more ways to connect their teams and modernize workplace communication through one unified platform.”

This acquisition marks Appspace’s third in the workplace communications category, following its successful integrations of Beezy and The Marlin Company.
